A UNIQUE UN BADGE

The UNFICYP UNICORN Hockey Club Badge (seen above) is an unique badge for a unique club. The club was formed with the help of 7 Squadron RCT in the autumn of 1975, with the aim of reviving Hockey within UNFICYP. A high spot of the season has been the Finnish Contingent participation. The Finns learnt the game in February 1976 and 3 members of their contingent now play regularly for the Force. Following a successful 6-a-side competition in March, which was won by the Workshop, the Unicorns have twice played the Saxons, the premier hockey club on the Island. The first game was predictably lost, but in the last game on Sunday 23 May the UNICORN held the Saxons to a 2-2 draw - an outstanding result for such a new club.

WHICH SWEDISH TEAM WON?

CANCON's number two team won the silver medals.

The first of the biannual Force Shooting Competitions took place at Dhakella Range on Sunday 30th May. As usual the Finnish Contingent organized an extremely exciting falling plate contest for team firing rifles, submachine guns and pistols.

The first final to be decided was between two Swedish teams and resulted in the SWEDCON team beating the Swedish Civil Police. In the SMG the Finnish Contingent's first team beat the Danish Contingent's first team. The last competition to be decided was the rifle, in which the Canadian first team beat the Canadian second team.

In each competition the losing finalists competed against each other to decide who should take third place. These were won by DANCON in the pistol competition, SWEDCON 2 in the SMG and AUSCON in the rifle.
