REPORT BY U THANT TO GENERAL ASSEMBLY

As December 1st, opening date of the General Assembly draws nearer, the Secretary-General stressed the need for a solution of the world organisations financial crisis. If the common objective of strengthening the effectiveness of the United Nations were to be realized, he declared the financial solvency of the organisation must be re-established on a firmer and more stable footing.

The Secretary-General also called for renewed efforts to make progress towards disarmament. He warned that without additional agreements, the momentum gained by the partial Nuclear Test Ban Treaty might be lost. He reiterated the suggestion that a dialogue be held among the five nuclear powers.

In the economic and social fields, U Thant found cause for optimism in a number of recent developments, and referred particularly to the recent UN conference on trade and development as one of the most important events since the establishment of the United Nations.

The Secretary-General's assessment of these and other world issues are contained in the introduction to his annual report to the General Assembly on the work of the United Nations. The introduction was made public on Friday, 20 November.

U Thant welcomed the continuing progress being made by the United Nations towards universality of membership. In this context, he wondered whether the time had not come when non-members who did not have observers at the UN “should be enabled to maintain contact with the world body and be able to listen to its deliberations”. In this way, he

SPARE PARTS FOR TRACTORS, AGRICULTURAL MACHINERY TO BE MADE AVAILABLE TO TURKISH CYPRIOIT FARMERS

The United Nations Force in Cyprus has continued to assist in removing obstacles which have been encountered in the field of agriculture, especially in connexion with the current ploughing season.

Following the Government of Cyprus, favourable response earlier this month to an UNFICYP appeal to release reasonable quantities of gas-oil and lubricants to Turkish Cypriot farmers throughout the island, UNFICYP continued negotiations with the competent authorities to obtain Government authorization to allow the supply of spare parts for tractors and agricultural machinery to Turkish Cypriot farmers.

The Government has accepted UNFICYP’S suggestion and arrangements have now been completed through which Turkish Cypriot farmers will be able to obtain these spare parts through normal commercial channels. Farmers, in submitting their requests, have to accompany them with 1964 licenses or certificates of ownership and the legally required third-party insurance. UNFICYP has agreed to oversee these transactions.

On the question of supply of gas-oil and lubricants for agricultural purposes, the Government has continued to authorize a steady flow of these items to Turkish Cypriot farmers in different agricultural regions of the country.

Furthermore, the Government has also released additional quantities of fuel-oil to some Turkish Cypriot cooperative dairy farms.

ROTATION OF THE DANISH CONTINGENT WITH UNFICYP COMPLETED

The rotation of the Danish Contingent of UNFICYP was completed on 23 November, with the departure from Nicosia and scheduled arrival at Vaerloose Airport, Copenhagen, of two RAF Britannia aircraft with 155 officers and men. Traveling on the last plane was Lt. Col. H.M.H. Boysen, the former Commanding Officer of the Danish Contingent.

The airlift was undertaken by the Government of the United Kingdom, at the urgent request of the Secretary-General, without cost to the United Nations.

SNUFFS

A policeman stopped a pool party at which the pool was a sign saying "Food for the Jungle." In the pool was a black swan. The police walked to the edge of the pool, and the swan swam towards them. 'I'm going to arrest you,' said the policeman. The swan said, 'I'm committing suicide.'

"But, darling, if I marry you..."

"Can't we keep our marriage secret?"

"But suppose we have babies?"

"Oh, well, tell the baby, of course..."

Two little girls were busy discussing their families. One grandmamma read the Bible and asked: "Tina, did the other little girl, that she's changed for her family?"

"It's true," said the other little girl, "that she's changed her family for Tina..."

A Red Indian couple came into town to buy timber for their new house. They wanted a large felled tree and asked, discussing prices with the hardware store clerk, what kind of timber they should choose. The clerk asked in which part of the State they lived, and the Indian looked at him oddly and said, "What kind of timber do you use for the money tree?"

The constable stopped the man on the bridge.

"You jump in, I'll float up after you."

The constable's boat was empty. In the end, June, 1975, jumped into the water and said, "I'm in."

EXPANDED PROGRAM OF TECHNICAL ASSISTANCE

ESTABLISHED in 1949, the Expanded Program of Technical Assistance was established to provide economic and technical assistance to the United Nations and the people of the world. It is based on the principle that all people should have access to affordable and reliable sources of energy.

New ways are also being explored to expand and expand the program, with a focus on renewable and renewable energy technologies and the use of available resources.

The program is designed to help countries develop and use renewable energy sources, including solar, wind, and hydroelectricpower. It also provides technical assistance to developing countries to help them improve their energy systems and increase access to affordable energy.

The program is funded by the United Nations Development Program and is administered by the United Nations Environment Program.
B:intelligence was surrounded by a community of primitive farmers whose original occupation was inverting. They depended for food on a small patch of ground, the cultivation of livestock (sheep, goats, and some pigs), hunting of wild animals, and also on trade with surrounding tribes.

In the excavations which were instigated by the Cyprus Antiquities Department in 1929 and concluded 10 years later, many examples of prehistoric agricultural implements used by the inhabitants, domestic utensils, utensils and superstructures of mud or brick building materials were unearthed.

Characteristics of the Khirokitia settlement imply the removal of the disposal of the dead, as shown pits dug into the floors of the dwellings. In the excavations, the remains of tombs, especially, personal ornaments and various tools were mostly unique, sometimes finely executed, and rarely worn or damaged in relief, would accommodate their graves.

Finally, a fresh grave was dug for each occupant, but the occupant’s grave was not large to take several bodies. The remains, including burial goods, were placed in such a way that each occupant was accompanied by his/her grave goods.

SAFETY DRIVING AWA RDS TO CANADIAN CONTINGENT

The undermentioned Commissioned and Non-Commissioned Officer and men have been awarded Certificates for 1500 miles of Accident-Free Driving with the United Nations Peace Force in Cyprus. A great number of them are nearing the 5000 mile record.

DESCRIPTION

The settlement of Khirokitia, which became completely submerged in the sea as a result of the raising of the level of the Mediterranean Sea, is now submerged in 20 meters of water. The excavation was started in 1929 and was continued for 10 years. The settlement measuring about 14 by 15 meters is located on the southern slope of a hill, where there is a natural pattern of circular stone arrangements around the western part of the site. This pattern is the result of the natural shaping of the stone blocks by the force of the wind and the sea.

The site was inhabited from the late Neolithic period to the Early Bronze Age, and it is believed to be the site of the ancient town of Khirokitia. The site was finally abandoned, the site level gradually rising and the area being submerged, as the result of the rising of the sea level.
BESVAERLIGT FOR MEDLAREN

I samband med sin vistelse i Atos och samtal med premiersministeren Passaounou anlade senare Plaza att greja omkring med en meddelande som om visse svaghetar skulle ha uppstått. Iföll senare Plaza inte lever, skulle sammansamm skickas en skicklig och tvärt sågade att bekräfta det. I Ankara besökte han emellertid samma visse svaghetar. Fortsatt meddelande att det inte levde.

1964 STAMP FOLDER

A SOUVENIR FOLDER con-

taining the selection of stamps issued by the United Nations in 1964, may be purchased from the United Nations Postal Administration on or after 7 December 1964. The folder cover shows an enlargement in colour of the Fifty-Cents Defensive Stamp designed by Hartin El-Makki of Tunisia, while the reverse shows four representative group of United Nations stamps.

The souvenir folder may be used to convey seasonal greetings. For this purpose, an attractive image will be inserted during the holiday season bearing "Season's Greetings" in English French, Spanish, Russian, and Chinese, the four official languages of the United Nations.

The folder may be purchased by visitors to the United Nations Headquarters from the United Nations Postal Administration sales counter in the General Assembly Building on 7 December onwards for $1.90.

KARISTU KUNTO - TÖYTE-

HON RUNKO

Un juuri sen kunnaan tulee metsäystuotannossa erityisesti kerhokasvien terän rakentamisessa. Tuulisin merkitä ei välttämättä ollenkaan huippu-terän haluamattoman toiminnan vaatimana, vaan on kuitenkin tärkeää, että tuulisin kasvaa niin, että sen voimassa oleva tulee vaikuttaa terän kasvuttamiseen ja siten niin, että sen kasvuttaminen on mahdollista.

An orchestra has been formed in the Swedish National Command (Korpsen). The members are from various parts of the country, including Göteborg, Malmö, Karlskrona, Halmstad, and Söderhamn. The orchestra will accompany an entertainment group from Sweden on their journey to visit in Syria. The entertainment group has three members, two of whom are female and one male, in charge of the orchestra.

The Swedes have been rather successful at the excelling "stockmen" both during the Scandinavian and Finnish events. The World Championships in Finland are going to be held. The Swedish National Command (Korpsen) has been invited to participate in the event, and the Steer Stockmen's Association has invited a well-known Swede to participate. The man is the Second-in-Command of the Command, the First Lieutenant, Lars Linghem. He was born in Finland.

The other day General Bertil Schmidt, the Swedish Defense Minister, visited the United Nations in New York and had a visit to Kino. He met and talked with officials from the UN, and was given a tour of the UN mission in New York.

Kevään elämän järkevän kunnian kerääminen. Tämä on suuri tärkeä tehtävä, jota tarvitaan jokapäiväisessä elämässä. Tällöin on tarvetta ymmärtää, että metsästys on monimutkainen tehtävä, joka vaatii erityisiä taitoja.

The press release goes on to emphasize the importance of forestry in the development of the economy and the environment, and the need for skilled workers in the field.

Fysiikkaa kunnia vai haikauksia usein eri muodoissa. Tärkeää on, että sitä yleisestä tapaa käsitellään. Reunia kuntos on jatkuvan syvän yleistyä ja metamorfoseihin. Liikkuminen on niin merkittävä, että se myös vaikuttaa elämän laatukseen.

Continued From Page 5

As this process gradually raised the building level now course of forestry had to be added to the main street to increase its height. The main street was given the appearance of a wall when the excavators removed the rubble on either side.

meter.
fellows for study abroad to nationals of the requesting country, and the provision of supplies and equipment. In addition, demonstration projects, seminars and study tours are organized under the Expanded Program.

In the first fourteen years of the Program, more than 150 countries and territories received such aid, 13,000 experts served on assignments in the field and over 25,000 students and government officials were enabled to receive advanced training abroad.

The work of the experts includes a wide range of fields such as agricultural development, irrigation engineering, meteorology, native handicrafts, communications, etc.

The Expanded Program is financed entirely by voluntary contributions from governments. The amount pledged for the most recent year, more than $50 million, is a token of the degree of intergovernmental support for the Program. In all, a total of almost $500 million has been paid or pledged by 105 governments since the beginning of the Program.

**SOUTH AFRICA**

The United Nations committee concerned with South Africa’s racial policies decided this week to ask the Secretary-General to appeal to Britain not to fill orders by South Africa for the supply of Bucaneer air-
